虽然许多人认为酸奶是一种健康饮品，但含糖量较高的酸奶其实未必健康。如果选对酸奶，它能为身体带来多种益处。一杯优质的酸奶不仅有助于维护消化系统健康，还能为人提供钙、蛋白质以及其它重要营养成分。本文简要探讨如何选择合适的酸奶，以及饮用酸奶可能带来的健康益处。

词汇: diary product 乳制品

1 Isn't yoghurt an ultra-processed , sugar-laden snack that we should avoid buying when we're in the supermarket? The truth is a bit more complicated, and it all depends on the yoghurt. Some do have a high sugar and fat content and offer few other health benefits. But when it comes to yoghurt, they are not the whole story .

2 Let's look at some of the potential benefits. Yoghurt is made by fermenting milk, which produces a number of live bacterial cultures . These helpful bacteria interact with our gut flora and have been associated with better digestive health . It's possible that this could lead to reduced symptoms in people with conditions such as irritable bowel syndrome . It's also been suggested that regularly consuming yoghurt could reduce inflammation and the risk of developing some kinds of bowel cancer. However, many types of yoghurt available in shops are pasteurised , which kills most of the helpful bacteria.

3 As well as providing calcium, B vitamins and phosphorus, yoghurt is high in protein . Protein can be important for muscle development, bone strength, and for controlling our appetites . Again, the choice of yoghurt can be important. Strained, Greek-style yoghurt is thicker than regular yoghurt and is particularly high in protein. 200g contains around double the amount of protein found in 200ml of milk.

4 The effect of fat in yoghurt is more complex. It is high in saturated fat, which could be a risk factor for heart disease. However, some studies suggest that saturated fat from whole milk , can provide beneficial forms of cholesterol , which might protect heart health. However, more research in this area is needed, and current UK government advice is to look for low-fat yoghurt.

5 There are many potential benefits as long as we choose the right yoghurt. Unsweetened Greek yoghurt that retains live bacteria is likely to be the best choice for our health.

测验与练习

一、将标题和段落配对。

Paragraph 1 _____ Paragraph 2 _____ Paragraph 3 _____ Paragraph 4 _____ Paragraph 5 _____

a. Protein provider b. Fat content c. Just a sweet snack? d. Choosing right e. Eating naturally f. Helpful bacteria

二、根据文章内容选出正确的选项。

1. All yoghurts have a high sugar content. a. True b. False c. Not given
2. Look at paragraph 2. What does 'this' refer to in the following sentence? It is possible that this could lead to reduced symptoms in people with conditions such as irritable bowel syndrome.
a. digestive health b. fermenting milk c. interaction between gut flora and bacteria from yoghurt
3. What process is used to make Greek yoghurt? a. pasteurisation b. straining c. sweetening
4. Greek yoghurt provides almost as much protein as milk. a. True b. False c. Not given
5. Yoghurt has been proven to benefit cardiovascular health. a. True b. False c. Not given

三、用下列单词完成对本文的总结。

Milk is 1) _____ to produce yoghurt. This produces 2) _____ which can provide health benefits when they interact with our 3) _____. This can help prevent 4) _____. However, these bacteria are not found in yoghurt that has been 5) _____.

pasteurised    cholesterol   gut flora saturated fat  
fermented bacterial cultures   inflammation

(答案见词汇表后)

词汇表

ultra-processed (

食品) 经过高度加工的 sugar-laden snack 含糖量高的零食 the whole story 事物的全貌 ferment 发酵
bacterial culture 细菌培养物 gut flora 肠道菌群 digestive health 消化系统健康 symptom 症状 irritable
bowel syndrome 肠易激综合征 inflammation 炎症 pasteurise 巴氏杀菌 (乳制品保鲜处理方法) protein 蛋白质
appetite 胃口, 食欲 strained 过滤的 saturated fat 饱和脂肪 risk factor 风险因素 whole milk 全脂牛奶
cholesterol 胆固醇

答案

一、将标题和段落配对。

Paragraph 1 c) Just a sweet snack? Paragraph 2 f) Helpful bacteria Paragraph 3 a) Protein provider Paragraph 4 b) Fat content Paragraph 5 d) Choosing right

二、选出每个单词或词组的准确含义。

1. a. False. Some do have a high sugar and fat content and offer few other health benefits.
2. c. The pronoun 'this' refers to this clause in the previous sentence 'These helpful bacteria interact with our gut flora and have been associated with better digestive health'.
3. b. Straining. Strained Greek-style yoghurt is thicker than regular yoghurt and is particularly high in protein.
4. b. False. 200g contains around double the amount of protein found in 200ml of milk.
5. b. False. However more research in this area is needed, and current UK government advice is to look for low-fat yoghurt.

三、用下列单词完成对本文的总结。

Milk is fermented to produce yoghurt. This produces bacterial cultures which can provide health benefits when they interact with our gut flora . This can help prevent inflammation . However, these bacteria are not found in yoghurt that has been pasteurised .
