Developing El Niño becomes strongest on record weeks before expected peak

厄尔尼诺持续发展，在预计达到峰值前数周已创下有记录以来最强水平

2026 年 9 月 19 日，太平洋中东部关键海域的日海表温度比平均水平高出 3.05 摄氏度，超过了 2015 年极强厄尔尼诺现象期间创下的 3.02 摄氏度纪录。

Scientists say the developing El Niño is already the strongest ever recorded, with sea temperatures in a **key region** of the Pacific more than three degrees above average, and this event is not expected to **peak** until later this year.

科学家表示，目前正在形成的厄尔尼诺现象已达到有记录以来最强水平，太平洋一个关键海域的海水温度比平均水平高出三度以上，而此次厄尔尼诺预计要到今年晚些时候才会达到峰值。

El Niño is a natural climate **phenomenon** that **occurs** when unusually warm water develops across the tropical Pacific, **disrupting** weather **patterns** around the world.

厄尔尼诺是一种自然气候现象，当热带太平洋出现大范围异常偏暖的海水时便会发生，扰乱全球各地的天气模式。

The Met Office says its impacts are already being felt, with **wildfires** in Indonesia and low water levels in the Panama Canal **restricting** international shipping. As it develops, it's expected to bring **droughts** and wildfires to parts of Australia, South America and southern Africa, while **coastal** Peru and Ecuador **face** the **threat** of **torrential** rain and **flooding**.

英国气象局表示，厄尔尼诺现象的影响已开始显现：印度尼西亚发生野火，巴拿马运河水位偏低，使国际航运受到限制。随着厄尔尼诺的进一步发展，预计澳大利亚、南美洲和南部非洲的部分地区将遭遇干旱和野火。与此同时，秘鲁和厄瓜多尔沿海地区面临暴雨和洪水的威胁。

词汇表

key	关键的
region	地区，区域
peak	达到峰值
phenomenon	现象
occurs	发生，出现
disrupting	扰乱，打乱
patterns	模式，规律
wildfires	野火
restricting	限制，阻碍
droughts	干旱，旱灾
coastal	沿海的

face	面临
threat	威胁
torrential	倾盆的
flooding	洪水，水灾

听力练习（答案见下页）

一、听第一遍音频，回答问题。

1. What's the main idea of the text?

二、用一分钟阅读下列问题，然后听第二遍音频并回答问题。

1. Scientists say the developing El Niño is the strongest ever recorded.
   a. True
   b. False
   c. Not given

2. El Niño is expected to reach its peak before the end of the year.
   a. True
   b. False
   c. Not given

3. What happens during El Niño?
   a. Unusually warm water develops across the tropical Pacific.
   b. Ocean temperatures fall across the Pacific.
   c. Strong winds develop only around Australia.

4. Low water levels in the Panama Canal are affecting international shipping.
   a. True
   b. False
   c. Not given

5. Which areas are expected to face torrential rain and flooding?
   a. Australia and southern Africa
   b. Coastal Peru and Ecuador
   c. Indonesia and the Panama Canal

答案

一、听第一遍音频，回答问题。

This article is about how El Niño is already causing unusually warm Pacific waters and is affecting weather and international shipping.

二、用一分钟阅读下列问题，然后听第二遍音频并回答问题。

1. **a. True.** *Scientists say the developing El Nino is **already the strongest ever recorded**.*

2. **a. True.** *This event is not expected to peak **until later this year**.*

3. **a.** *El Niño is a natural climate phenomenon that occurs when **unusually warm water develops across the tropical Pacific,** disrupting weather patterns around the world.*

4. **a. True.** *The Met Office says its impacts are already being felt, with wildfires in Indonesia and **low water levels in the Panama Canal restricting international shipping** as it develops.*

5. **b.** *Coastal **Peru and Ecuador** face the threat of torrential rain and flooding.*

三、听第三遍音频，将句子补充完整。（提示：可以反复听，直到听清楚每一个词）

1. Scientists say the developing El Niño is already the strongest ever recorded, with sea temperatures in a key region of the Pacific more than three degrees **above average** and this event is not expected to peak until later this year.

2. The Met Office says its impacts **are already being** felt, with wildfires in Indonesia and low water levels in the Panama Canal restricting international shipping as it develops.
