

基于从卢旺达获取的数据，研究人员进而展开的新研究表明，雌性山地大猩猩之间建立的关系比人们此前认为的更加重要。

Moving from one group to another is something that **shapes** both gorilla and human society. To understand more about its **evolutionary** origins, researchers studied decades of data on mountain gorillas in the Volcanoes National Park in Rwanda, an area that's been monitored by the Dian Fossey Gorilla Fund since the 60s.

从一个群体迁移到另一个群体，这种行为塑造着大猩猩和人类社会。为了进一步了解这种行为的进化起源，研究人员研究分析了几十年来在卢旺达火山国家公园居住的山地大猩猩的数据，该区域自上世纪 60 年代以来一直受到黛安·弗西大猩猩基金会的监测。

The research team tracked the **dispersal** of 56 different female gorillas over the years. They discovered that the animals **tended to** join groups with females they knew, friends they'd grown up with or females that they'd made a **social connection** with more recently. Even if two females had been apart for many years they'd often **reunite** when an animal moved groups. The scientists say this shows that the relationship between two female gorillas is much more **socially significant** than previously thought.

该研究团队多年来追踪了 56 只雌性大猩猩的分布情况。他们发现这些动物倾向于加入它们认识的雌性大猩猩，或是加入那些和它们一起长大的朋友们、或者是近期和它们建立社交联系的雌性群体。即使两只雌性大猩猩已经分别多年，但当其中一只迁移群体时，它们可能会再度团聚。科学家们表示，这表明两只雌性大猩猩之间的关系比人们此前认为的更具社会意义。

词汇表

shapes	塑造
evolutionary	进化的
dispersal	分布
tended to	倾向于
social connection	社交联系
reunite	（使）团聚，（使）重聚
socially significant	具有社会意义的

听力练习（答案见下页）

一、听第一遍音频，回答问题。

1. What is this article about?
 - a. How female gorillas find new friends.
 - b. How female gorillas maintain friendship.

二、用一分钟阅读下列问题，然后听第二遍音频并回答问题。

1. Moving between groups damages gorillas socially.
 - a. True
 - b. False
 - c. Not given
2. The study looked at more than 10 years' worth of data.
 - a. True
 - b. False
 - c. Not given
3. What made female gorillas more likely to join groups?
 - a. the group had existed for many years
 - b. they had grown up with a member of the group
 - c. the group was monitored
4. What conclusion have scientists made from this data?
 - a. social relationships make groups stronger
 - b. female gorillas like to spend many years apart
 - c. relationships between female gorillas are more important to their society than was thought

三、听第三遍音频，将句子补充完整。（提示：可以反复听，直到听清楚每一个词）

1. Moving from _____ is something that shapes both gorilla and human society.
2. Even if two females had been apart for many years _____ when an animal moved groups.

答案

一、听第一遍音频，回答问题。

1. What is this article about?
 - a. How female gorillas find new friends.
 - b. How female gorillas maintain friendship.

b. The article mentions female gorillas joining groups with females they knew, friends they'd grown up with or that they'd made a social connection with. It also mentions that they would reunite even if they had been apart for many years.

二、用一分钟阅读下列问题，然后听第二遍音频并回答问题。

1. **b. False.** *Moving from one group to another is something that **shapes** both gorilla and human society.*
2. **a. True.** *To understand more about its evolutionary origins, researchers studied **decades** of data on mountain gorillas in the Volcanoes National Park in Rwanda, an area that's been monitored by the Dian Fossey Gorilla Fund since the 60s.*
3. **b.** *They discovered that the animals tended to join groups with females they knew, **friends they'd grown up with** or females that they'd made a social connection with more recently.*
4. **c.** *The scientists say this shows that the relationship between two female gorillas is **much more socially significant than previously thought**.*

三、听第三遍音频，将句子补充完整。（提示：可以反复听，直到听清楚每一个词）

1. Moving from **one group to another** is something that shapes both gorilla and human society.
2. Even if two females had been apart for many years **they'd often reunite** when an animal moved groups.
