

Sustainable tourism partnership encourages  
visits to protected sites following Unesco report  
联合国教科文组织报告促成新合作，鼓励可持续游览  
英国受保护遗址

---

联合国教科文组织的一份报告指出，虽然自 1970 年以来全球野生动物种群数量大幅骤降，但对自然区域的保护仍成功帮助了保护区内野生动物数量维持稳定。不过，气候变化、极端天气和栖息地丧失正让这些保护区面临日益沉重的压力。为此，教科文组织已与一家英国铁路运营商开展合作，共同推广可持续旅游，以进一步保护这些脆弱的生态区域。

The report highlights how people and nature can **thrive** together with wildlife across more than 5,000,000 sq miles of **protected** land remaining on average **stable, despite** a 73% global decline in **monitored** population since 1970.

该报告强调，人与自然可以和谐共生，因为在超过 500 万平方英里的受保护土地上，野生动物的种群数量总体保持稳定，尽管自 1970 年以来，全球受监测的野生动物种群数量平均下降了 73%。

But the research says many of these areas are increasingly under pressure from rising temperatures, extreme weather and **habitat** loss.

但研究指出，受气温升高、极端天气和栖息地丧失的影响，这些保护区面临的压力正日益增大。

Unesco says a quarter of the sites could reach **critical tipping points** by 2050, with the loss of **glaciers**, forests and **coral reefs**.

联合国教科文组织表示，到 2050 年，四分之一的遗址可能达到关键临界点，届时冰川、森林和珊瑚礁将面临消失的风险。

It says this progress shows what's possible with long-term protection and community support and is calling for greater **investment** and faster action to **safeguard** them.

该组织还表示，目前的进展显示了长期保护和社区支持所带来的成效，并呼吁加大投资、加快行动，以保护这些宝贵的遗产。

## 词汇表

|               |         |
|---------------|---------|
| thrive        | 繁荣生长    |
| protected     | 受保护的    |
| stable        | 稳定的     |
| despite       | 即使，尽管   |
| monitored     | 受监测的    |
| habitat       | 栖息地     |
| critical      | 关键的     |
| tipping point | 临界点，转折点 |
| glaciers      | 冰川      |
| coral reefs   | 珊瑚礁     |
| investment    | 投资      |
| safeguard     | 保护，保卫   |

## 听力练习（答案见下页）

一、听第一遍音频，回答问题。

1. What does the report highlight about the relationship between people and nature?
  - a. They cannot coexist without conflict.
  - b. They can thrive together with wildlife in protected areas.
  - c. Nature should be separated completely from humans.

二、用一分钟阅读下列问题，然后听第二遍音频并回答问题。

1. Wildlife populations in protected areas have increased since 1970.
  - a. True
  - b. False
  - c. Not given
2. What factors are putting pressure on protected areas according to the research?
  - a. climate change
  - b. increasing farming
  - c. tourism
3. Half of the Unesco sites could reach critical tipping points by 2050.
  - a. True
  - b. False
  - c. Not given
4. What action is Unesco calling for to protect these areas?
  - a. greater investments and faster actions
  - b. less community involvement
  - c. reducing tourism and closing parks

三、听第三遍音频，将句子补充完整。（提示：可以反复听，直到听清楚每一个词）

1. The report highlights how people and nature can thrive together with wildlife across more than 5,000,000 sq miles of protected land remaining \_\_\_\_\_ stable, despite a 73% global decline in monitored population since 1970.
2. Unesco says a quarter of the sites could reach critical tipping points by 2050, with \_\_\_\_\_ glaciers, forests and coral reefs.

## 答案

一、听第一遍音频，回答问题。

1. **b.** *The report highlights how **people and nature can thrive together with wildlife** across more than 5,000,000 sq miles of protected land...*

二、用一分钟阅读下列问题，然后听第二遍音频并回答问题。

1. **b. False.** *The report highlights how people and nature can thrive together with wildlife across more than 5,000,000 sq miles of protected land remaining on average stable, despite a **73% global decline in monitored population since 1970.***
2. **a.** *But the research says many of these areas are increasingly **under pressure from rising temperatures, extreme weather and habitat loss.***
3. **b. False.** *Unesco says **a quarter of the sites could reach critical tipping points** by 2050, with the loss of glaciers, forests and coral reefs.*
4. **a.** *It says this progress shows what's possible with long-term protection and community support and is calling for **greater investment and faster action to safeguard them.***

三、听第三遍音频，将句子补充完整。（提示：可以反复听，直到听清楚每一个词）

1. The report highlights how people and nature can thrive together with wildlife across more than 5,000,000 sq miles of protected land remaining **on average** stable, despite a 73% global decline in monitored population since 1970.
2. Unesco says a quarter of the sites could reach critical tipping points by 2050, with **the loss of** glaciers, forests and coral reefs.
