

Very hot drinks may increase cancer risk, study says

研究表明：饮用过烫饮品或增加患癌风险

英国一项研究显示，经常饮用温度过高的茶、咖啡等饮品，可能会增加患食管癌的风险。研究指出，滚烫的液体在进入胃部的过程中，也可能损伤食管内壁的细胞层。

The Oxford University team behind the study says any drink at or above 65C is "very hot" and **poses** a potential risk. Compared with people who drank "warm" **beverages**, those who **consumed** "very hot" ones had around a three times higher risk of **squamous cell oesophageal** cancer.

开展这项研究的牛津大学团队表示，任何温度达到或超过 65 摄氏度的饮品都“非常烫”，可能带来潜在风险。与饮用“温热”饮品的人相比，饮用“非常烫”饮品的人患食管鳞状细胞癌的风险约为其三倍多。

There are several thousand cases each year in the UK, but experts **stress** the overall chance of getting this cancer of the **gullet** is still low. Smoking and drinking alcohol are far bigger **established risk factors**, although waiting a few minutes for your hot drink to cool a bit is **advisable**.

英国每年有数千例食管癌病例，但专家强调，就普通人群而言，患上这种食管癌的总体风险仍然较低。吸烟和饮酒是已被证实、影响更大的风险因素。不过，等上几分钟，让热饮稍微冷却后再喝仍是明智之举。

词汇表

poses	带来
beverages	饮品
consumed	饮用
squamous cell	鳞状细胞
oesophageal	食管的
stress	强调
gullet	食管，食道
established	已被证实的
risk factors	风险因素
advisable	明智的

听力练习（答案见下页）

一、听第一遍音频，回答问题。

1. In this study, drinking "very hot" drinks is seen as...
 - a. positive.
 - b. negative.
 - c. neutral.

二、用一分钟阅读下列问题，然后听第二遍音频并回答问题。

1. What is a "very hot" drink, according to this study?
 - a. 65C
 - b. above 65C
 - c. both
2. Those who drank "warm" drinks had a lower risk of cancer, compared with those who drank "very hot" drinks.
 - a. True
 - b. False
 - c. Not given
3. There are _____ cases of squamous cell oesophageal cancer each year in the UK.
 - a. less than 1,000
 - b. 1,000
 - c. more than 1,000
4. Eating sugary foods increases the risk of getting squamous cell oesophageal cancer.
 - a. True
 - b. False
 - c. Not given
5. What advice is given about drinking hot beverages?
 - a. Reduce your intake
 - b. Wait for them to cool a little
 - c. Drink them with food

三、听第三遍音频，将句子补充完整。（提示：可以反复听，直到听清楚每一个词）

1. The Oxford University team behind the study says any drink _____ 65C is "very hot" and poses a potential risk.
2. There are several thousand cases each year in the UK, but experts stress the overall chance of getting this cancer of the gullet _____.

答案

一、听第一遍音频，回答问题。

1. In this study, drinking "very hot" drinks is seen as...
b. negative.

二、用一分钟阅读下列问题，然后听第二遍音频并回答问题。

1. **c.** *The Oxford University team behind the study says **any drink at or above 65C** is "very hot" and poses a potential risk.*
2. **a. True.** *Compared with people who drank "warm" beverages, **those who consumed "very hot" ones had around a three times higher risk** of squamous cell oesophageal cancer.*
3. **c.** *There are **several thousand** cases each year in the UK...*
4. **c. Not given.** Smoking and drinking alcohol are included as risk factors, but there is nothing mentioned about eating sugary foods.
5. **b.** *... **although waiting a few minutes for your hot drink to cool a bit is advisable.***

三、听第三遍音频，将句子补充完整。（提示：可以反复听，直到听清楚每一个词）

1. The Oxford University team behind the study says any drink **at or above 65C** is "very hot" and poses a potential risk.
2. There are several thousand cases each year in the UK, but experts stress the overall chance of getting this cancer of the gullet **is still low.**
