

词汇: *food safety* 食品安全

- 1 The **dizzying** variety of options, the amazing range of flavours, and for some of us, the **sheer quantity** that you can eat. It's easy to see the appeal of a buffet. It takes the stress out of choosing what to eat - just have it all! But are there risks that we need to think about? Food **hygiene** specialists suggest there might be.
- 2 Restaurant and hotel buffets can be a **food poisoning** risk. The large number of different dishes and people serving themselves creates opportunities for **cross-contamination**. **Microbes** can be transferred from people to dishes, from dishes to people and from one dish to another. Even the air can transfer microbes to your food. It's easy to see how an entire buffet could end up contaminated. Food temperature creates another risk factor. It's easy for food to be kept **lukewarm** and in the danger zone between 8C and 63C where **bacteria** and other microbes grow and **multiply** easily.
- 3 Restaurants that manage buffets well can reduce the risks. Hot food should be replaced after two hours and cold food after four. It's important that the old food **is disposed of** and that containers are not just **topped up**, allowing the older food to contaminate fresh items. Hot food should be kept above 63C, and cold food should be refrigerated.
- 4 However, any attempts by hospitality businesses to reduce risks can easily be **undone** by careless clients. There are many ways that diners can **unwittingly** or **thoughtlessly** increase the risks. **Tongs** and **ladles** can be contaminated by those who do not wash their hands, or who reuse their plates when getting a **second helping**. Food on display can be contaminated by people using the wrong **utensil** or who accidentally drop the handles into bowls of food. That's before even mentioning those who cough or sneeze near the buffet.
- 5 So, to enjoy a buffet, while keeping the risks as low as possible, you should check to see that it is well-managed by the restaurant or hotel, that others are following good hygiene rules and that you do the same. Even so, a buffet is likely to be more risky than other types of restaurants.

测验与练习

一、将标题和段落配对。

Paragraph 1 _____

Paragraph 2 _____

Paragraph 3 _____

Paragraph 4 _____

Paragraph 5 _____

- a. What to look for
- b. Food safety risks
- c. Dangerous foods
- d. Risky behaviour
- e. No need to choose
- f. What restaurants can do

二、根据文章内容选出正确的选项。

1. Food safety experts consider buffets safe.

- a. True
- b. False
- c. Not given

2. Larger and busier buffets are riskier.

- a. True
- b. False
- c. Not given

3. At what temperature does cold food begin to be unsafe?

- a. 20C
- b. 8C
- c. 63C

4. Diners can transfer microbes to serving utensils.

- a. True
- b. False
- c. Not given

5. What does 'those' refer to in the following sentence? *That's before even mentioning **those** who cough or sneeze near the buffet.*

- a. utensils
- b. food
- c. clients

三、用方框中的单词完成对本文的总结。

Buffets can be a source of bad food **1)** _____. Having so many dishes close together makes **2)** _____ likely. Food is often left at **3)** _____ temperatures allowing bacteria to grow easily. Risk can be reduced by a well-managed buffet where surplus food is **4)** _____ before it gets dangerous. It is almost important that diners use **5)** _____ correctly.

microbes	utensils	lukewarm
hygiene		disposed of
topped up		cross-contamination

（答案见词汇表后）

词汇表

dizzying	令人眼花缭乱的
sheer quantity	分量之大
hygiene	卫生
food poisoning	食物中毒
cross-contamination	交叉污染
microbe	微生物
lukewarm	温的，微热的
bacterium	细菌
multiply	繁殖，大幅增加
be disposed of	被处理掉，被丢弃
top up	添加，补满
undo	消除，抵消
unwittingly	无意地，不知情地
thoughtlessly	不经意地，粗心地
tongs	夹子
ladle	长柄勺
second helping	再次取餐
utensil	（厨房的）器具，用具

答案

一、将标题和段落配对。

Paragraph 1 **e) No need to choose**

Paragraph 2 **b) Food safety risks**

Paragraph 3 **f) What restaurants can do**

Paragraph 4 **d) Risky behaviour**

Paragraph 5 **a) What to look for**

二、根据文章内容选出正确的选项。

1. **b. False.** *But are there **risks** that we need to think about? **Food hygiene specialists suggest there might be.***
2. **a. True.** *The **large number of different dishes and people serving themselves** creates opportunities for cross-contamination.*
3. **b. It's easy for food to be kept lukewarm and in the **danger zone between 8C and 63C** where bacteria and other microbes grow and multiply easily.**
4. **a. True.** ***Tongs and ladles can be contaminated** by those who do not wash their hands, or who reuse their plates when getting a second helping.*
5. **c. Food on display can be contaminated by **people using the wrong utensil** or who accidentally drop the handles into bowls of food. That's before even mentioning **those** who cough or sneeze near the buffet.**

三、用方框中的单词完成对本文的总结。

Buffets can be a source of bad food **hygiene**. Having so many dishes close together makes **cross-contamination** likely. Food is often left at **lukewarm** temperatures allowing bacteria to grow easily. Risk can be reduced by a well-managed buffet where surplus food is **disposed of** before it gets dangerous. It is almost important that diners use **utensils** correctly.
